

GUJARAT TECHNOLOGICAL UNIVERSITY

B.Pharm

SEMESTER: V

Subject Name: Pharmacology and Pharmacotherapeutics–I

Subject Code: 2250005

| Teaching Scheme | | | | Evaluation Scheme | | | |
|-----------------|----------|-----------|-------|-------------------|----------|-----------|----------|
| Theory | Tutorial | Practical | Total | Theory | | Practical | |
| | | | | External | Internal | External | Internal |
| 3 | 0 | 3 | 6 | 80 | 20 | 80 | 20 |

Theory

| Sr No | Course Contents | Total Hrs |
|-------|---|-----------|
| 1 | Pharmacology of Peripheral and Autonomic Nervous system | |
| | Neurohumoral transmission (autonomic and somatic)- organization and function, co-transmission | 03 |
| | Cholinergic system and drugs- cholinergic transmission, receptors, Parasympathomimetics, anticholinesterases, anticholinesterase poisoning, Parasympatholytics, drugs acting on autonomic ganglia (stimulants and blockers) | 06 |
| | Adrenergic system and drugs- adrenergic transmission, direct, indirect and mixed Sympathomimetics, Sympatholytics, Neuron blocking agents | 06 |
| | Skeletal muscle relaxants (peripherally, directly and centrally acting) – classification, mechanism of actions, actions and uses, difference between competitive and non-competitive blockers, difference between centrally and peripherally acting muscle relaxants. | 03 |
| | Local anaesthetics- classification, mechanism of actions, local and systemic actions, adverse effects, uses and techniques of local anaesthesia | 02 |
| 2 | Autacoids | |
| | Histamine- pharmacological actions, pathophysiological actions, Histamine releasers, antihistaminics | 03 |
| | 5-HT- pharmacological and pathophysiological actions, 5-HT antagonists, drug therapy of migraine | 03 |
| | Prostaglandins and leukotrienes- actions, pathophysiological role, uses, Platelet activating factor, bradykinin., angiotensin | 02 |
| 3 | Pharmacology of following class of drugs | |
| | Laxatives- classification, mechanism of action, details of each class, and antidiarrhoeal drugs- oral rehydration, drug therapy- specific and non-specific, details of each class of drugs | 03 |
| | Emetics and antiemetics- classification, uses, contraindications | 02 |
| | Antitussive agents and Expectorants- classification , individual drugs | 02 |
| 4 | Definition, epidemiology, etiology, pathophysiology, signs and symptoms, diagnosis, complications, treatment and management of following diseases/conditions: | |
| | Bronchial asthma, COPD | 3 |
| | Peptic Ulcer Disease, Gastro Esophageal Reflux Disorder (GERD) | 2 |
| | Inflammatory Bowel Disease | 2 |

| | | |
|--|-----------|---|
| | Hepatitis | 2 |
| | Glaucoma | 1 |

Practical – 22500P5

| Sr. No. | Content |
|---------|---|
| 1 | Introduction to experimental pharmacology, commonly used instruments in experimental pharmacology |
| 2 | Legal regulations for the use of experimental animals, common laboratory animals, Euthanasia of laboratory animals, anesthetics used in animal studies |
| 3 | Some common and standard techniques for drug administration (intravenous injection, intra gastric administration) and collection of blood samples |
| 4 | Preparation of different solutions for experiments. Drug dilutions, use of molar and W/V solutions in experimental pharmacology |
| | To study the effects of various agonists (pD ₂) and antagonist (pA ₂) using isolated preparations. |
| 5 | To record the concentration response curve (CRC) of acetylcholine using rat ileum/chicken preparation. |
| 6 | To study the effect of atropine on concentration response curve (CRC) of acetylcholine using rat/chicken ileum preparation. |
| 7 | To record the concentration response curve (CRC) of Histamine on guinea pig/chicken ileum |
| 8 | To study the effect of mepyramine on concentration response curve (CRC) of Histamine using guinea pig /chicken ileum preparation |
| | Demonstration Experiments :-To study the effects of autonomic drugs on rabbits eye |
| 9 | Demonstration Experiments :-To study the effect of hepatic microsomal enzyme inhibitors and inducers on pentobarbitone sleeping time |
| 10 | Case studies (questions based on history, etiology, symptoms, investigations, medication, adverse effects, drug interactions, pharmacists' advice) |
| 11 | To evaluate case study of Bronchial asthma / COPD (minimum 3 cases) |
| 12 | To evaluate case study of Peptic ulcer disease (minimum 3 cases) |
| 13 | a. To evaluate case study of Hepatitis (minimum 2 cases) b. To evaluate case study of Cough (minimum 2 cases) |
| 14 | a. To evaluate case study of Glaucoma (1 case) b. To evaluate case study of Organophosphorus poisoning (1 case) c. To evaluate case study of Myasthenia gravis (1 case) |
| 15 | a. To evaluate case study of diarrhoea and constipation (minimum 2 cases) b. To evaluate case study of emesis (minimum 2 cases) |
