Description:

Virtual Lab @SIT_TE is aimed at providing an opportunity to "Any one, Any time and Any where" to conduct experiments related to Electronic circuits. The user of this lab will get the access to vary the settings of various signals applied to the circuit as well as some hardware components of the circuit during the conduction of experiment. In the allotted time slot, the user can conduct any of the available experiments and can repeat the experiments any number of times from any where. As a Proof of concept Virtual Lab @SIT_TE is launching 4 Analog experiments namely, CE amplifier, Schmitt Trigger, Oscillator and PWM generator experiments. I invite the participants of the webinar to use Virtual Lab @SIT_TE during the session.

Note: TeamViewer tool is a necessary to access Virtual Lab @SIT_TE.
