Objective of the STTP

The STTP is aimed at increasing the interest of Students, faculty members and industry professionals in the subject so that teachers can disseminate the knowledge to their students in a much better way. Experts who have worked on latest wireless technologies and mobile application development will share their experience which will be very useful to the students and faculty of UG and PG courses in EC, IT and Computer Engineering.

Brief outline of the STTP

The short term training programme mainly aims at the subjects on wireless technologies and their applications. The course content is designed in such a way that it gives a chance to participants to have hands-on to learn in the lab sessions too. Mainly the target topics covers Symbian, Android, iPhone and WP7 for Mobile Devices and a bunch full of practical sessions on developing mobile applications using various technology platforms like Qt, WRT, PyS60 on Symbian and Android devices.

Resource Persons

Participants of the STTP will be benefited by expertise and rich experience of faculty of GTU and professional trainer and experts from the industry.

Other eminent faculties and research experts from educational institutes and industries will also deliver the lectures and will conduct hands on laboratory sessions
