IBM Internship Program

The Data Analytics

The Data Analytics Internship program is designed to bring you experiential learning in data science using Python, Machine Learning, and Data Visualization over the period of 12 weeks. Students will learn a practical approach through an interactive learning environment, professional guidance from industry experts and working on real-time projects.

With a right mixture of learning and mentoring, students will learn how to build forecasting models and apply analytical solutions to predict a situation. IBM Data Analytics Internship program will give hands-on experience of working with analytical tools along with vital techniques for data cleaning, regression, clustering and data visualization.

IBM Data Analytics Internship program concludes with Pitch Night where teams pitch their solutions to facilitators, stakeholders and potential employers or investors.

Key Benefits

- Opportunity to gain full-time job employment opportunity by IBM & its network partners.
- Learn through customized content with periodic personalized mentoring sessions & masterclasses.
- Grow your professional network
- Transform your learning into a tangible showcase for future employers.
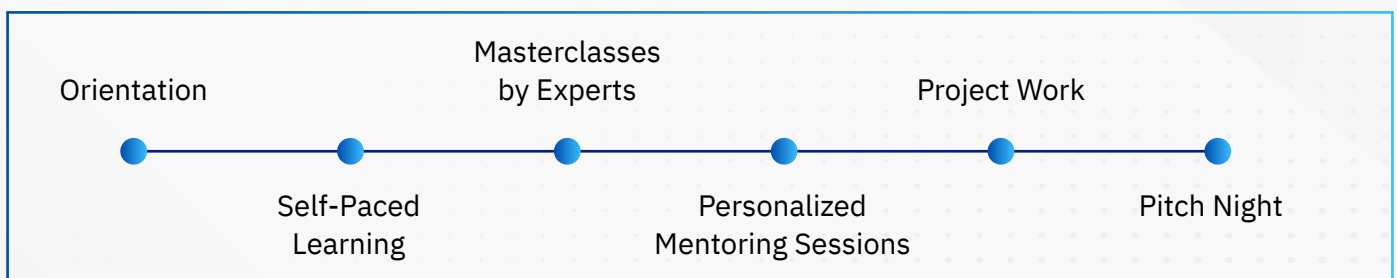

Time Commitment
12 Weeks
