Guidelines for API Score calculation regarding UGC Regulations, 2010

Calculation of API score for Category –III

RESEARCH PUBLICATIONS:

• Research Papers

- 15 points per publication in refereed journals.
- 10 points per publication in non-refereed but recognized and reputed journal with ISSN/ISBN numbers.
- 10 points per publication in conference proceedings as full papers.

Augmentation in API scores for papers in referred journals.

- 5 points of indexed; 10 points for impact factor between 1 & 2, 15 points for impact factor between 2 & 5 and 25 points for impact factor between 5 & 10.
- For example if a research paper is published in a refereed indexed journal with impact factor 3.17, then the total API score for that publication will be 15+5+15=35. In case a research paper is published in a referred indexed journal with impact factor 0.56, then the total API score for the publication will be 15+5=20. If a research paper is not published in any refereed journal but in a journal having ISSN/ISBN number, then there will not be any augmentation of points to the total points (which is 10) for such a publication.

Calculation of API scores for joint publications.

- In case of the 60% of API are to be distributed among more than one author, each will be allotted 60%. The same will be the rule to distribute 40% of API.

• Books, Chapters in Books, other than Referred Journal Articles

50 points per sole author : In case of joint authorship, points will be equally distributed. For instance if there are THREE authors say X, Y and Z for a book then X, Y and Z will get 17 points each.

10 points per chapter in an edited book : Maximum points for writing chapters in an edited book can not be more than 50 for sole author. In case there are THREE authors writing a chapter in an edited book, then 10 points will be distributed among them and each author will get 4 points.

- Subjects Books by National level publishers with ISBN/ISSN numbers.

25 points per sole author: In case of joint authorship, points will be equally distributed. For instance if there are THREE authors say X, Y and Z for a book then X, Y and Z will get 9 points each.
