COURSE CURRICULUM
COURSE TITLE: MANAGEMENT INFORMATION SYSTEM
(COURSE CODE: 3351604)

1. RATIONALE

The objective of Management Information System (MIS) is to make students aware about how information systems work in different functional areas and provide information according to the needs of different management levels. This course covers basic concepts and its understanding would help students to lean most recent variants of the information systems. After going through this course, student will be able to differentiate between MIS requirement based on functional area and fundamentals of its designing. They will learn about security issues and ethics related to the information systems. They will also learn about designing MIS and use of IT Infrastructure for establishing designed system.

2. LIST OF COMPETENCIES

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competencies:

- **Design Management Information System based on given requirement and suggest IT infrastructure to establish the same.**

3. COURSE OUTCOMES:

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

i. Explain need and importance of Management Information System.

ii. Describe the role of MIS in various functional areas of management.

iii. Explain the determination of requirement and analysis it to design information system necessary.

iv. Elaborate the supporting role of MIS in decision-making.

v. Describe importance of integration of information with MIS

vi. Explain need for security in MIS

| Unit – I  
Introduction to MIS | 1a. Explain Information System and its roles  
1b. Classify Information  
1c. Elaborate Management Information System  
1d. Describe Benefits and Limitations of MIS | 1.1 Introduction to Information System  
1.2 Why information system?  
1.3 Classification of Information  
1.4 Key aspects of Management  
1.5 What is MIS? Definitions, roles and features  
1.6 Structure of Management Information System  
1.7 Benefits of Management Information System  
1.8 Limitations of Management Information System |
| Unit – II  
MIS Development | 2a. Describe the roles of systems analysts  
2b. State the Tools used by system analyst in designing Information system | 2.1 Overview of design of an information system  
2.2 The role and tasks of systems analysts,  
2.3 Tools used by system analyst in designing Information system |
|  | 2c. Describe MIS Development Life Cycle  
2d. State the features of MIS Development Models  
2e. Elaborate MIS Design & Development Phase | 2.4 MIS Requirement Analysis  
2.5 MIS Requirement Specification  
2.6 Feasibility Analysis & Report  
2.7 MIS Development Models  
2.8 MIS Design & Development Phase |
| Unit – III  
Decision Support System in MIS | 3a. Define Decision Support System  
3b. Describe Characteristics and Components of DSS  
3c. Elaborate Decision Support Models  
3d. Explain Risks of DSS | 3.1 Types of Decisions  
3.2 What is DSS?  
3.3 Characteristics of DSS  
3.4 Components of DSS  
3.5 Role of Decision Support System in MIS  
3.6 Decision Support Models  
3.7 Risks of DSS in MIS |
| Unit – IV  
Integration of Information | 4a. State the areas of MIS Integration with various business function area  
4b. Elaborate following terms - ERP, EMS, CRM, BPO, E-Commerce, E-Commerce,  
4c. Explain Data Warehouse and Data Mining. | Areas of MIS Integration with various business function  
4.1 Enterprise Resource Planning (ERP) & MIS  
4.2 Enterprise Management System (EMS) & MIS  
4.3 Customer Relationship Management (CRM)  
4.4 Business Process Outsourcing (BPO) -BPO,  
4.5 Electronic Commerce Systems (E-Commerce)  
4.6 Data Warehouse and Data Mining |

**Note:** This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

### 7. SUGGESTED LIST OF EXERCISES/PRACTICAL

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (outcomes in psychomotor and affective domain) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

**Note:** Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of Course Outcomes related to affective domain. Thus over all development of Programme Outcomes
(as given in a common list at the beginning of curriculum document for this programme) would be assured.
Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

8. **SUGGESTED LIST OF STUDENT ACTIVITIES**

Following is the list of proposed student activities such as:

i. Design sample MIS for different requirements and give seminar presentation in groups.

ii. Presentation of findings of practical exercise sr. no. 1 and 2 as done in *Example practical above.*
9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

i. Faculty should demonstrate an Open source MIS of their choice, can select from the below learning resources and demonstrate the usage and importance of MIS as a special class.
